

Move2Mac

Transfer your data quickly and easily
from your PC to the Mac

Switching from the PC to the Mac?

Move2Mac is a software solution that lets you easily move information from your PC to the Mac, saving you from the tedious process and frustrations of doing it manually. Move2Mac lets you quickly and easily transfer music, photos, files, folders, and more. But, Move2Mac does more than just move data files. It also moves important settings like Internet Explorer favorites and backgrounds, as well as move and convert your e-mail messages, address book and calendar for Outlook on the PC to Mac's Apple Mail. With Move2Mac, you'll be productive right from the start!

Key Benefits

- **Saves time** - Moving from a PC to a Mac by yourself can take hours. With Move2Mac, a typical migration of 500 MB takes about 15 minutes.
- **Eliminates frustration** - Without Move2Mac, you'll have to go through a tedious process that includes burning CDs and copying them to your Mac, or even worse, emailing the files from the PC to the Mac. On top of all that, you'll still have to set up all your folders again. The bottom line – it's a real pain to do the move without Move2Mac.
- **Choose how to move** - Move2Mac gives you a flexibility to choose how you will want to move from your PC to your Mac: Ethernet Wire/Wireless Network or External Portable Device such as hard drive.

- Your results will vary upon your old PC network adapter and wireless network router.

What are the system requirements?

For PC:

- Microsoft® Windows® XP and Vista; 500 MB hard disk space, 128 MB RAM
- 32 bit Windows Operating System

For Mac:

- Mac OS X 10.5 and later

What happens to my folders that are on the PC?

Move2Mac moves relevant folders from the PC to the Mac and preserves the folder structure. For example, the Windows folder My Documents, its contents, and its subfolders, are moved to the Mac and placed in the appropriate Documents folder.

Does Move2Mac convert PC files to Mac format?

Move2Mac transfers files from the PC to the Mac. Move2Mac does not move applications or convert PC files to Mac format. Most applications, which have a PC version and a Mac version (like Microsoft Office), can open PC files on the Mac without any conversion. Note: that there are a few applications (for example Quicken®) whose PC files require conversion to Mac format before the files can be used on the Mac.

Does Move2Mac migrate email?

Move2Mac will move and convert the e-mail messages, address book and calendar for Outlook on the PC to Mac OS X 10.5 Apple Mail. Note: for those using Entourage, a folder named "Data to Import" will be placed on the Mac Desktop to import into Microsoft Entourage.

Will Move2Mac move files from the Mac to the PC?

Move2Mac only moves files from the PC to the Mac.

Can I use Move2Mac for migrations on more than one computer?

A single user license of Move2Mac allows multiple migrations from one, and only one, specific PC to any number of Macs. To migrate from another PC requires an additional copy of Move2Mac. Note that volume license packs of Move2Mac are available.

Does Detto have a solution to move files from one PC to another?

Detto's award-winning product IntelliMover is a PC product that will move information, including email, files, folders, application and system settings from one PC to another.
