

WIPEDRIVE 9.5 RELEASE

We are excited to announce the release of WipeDrive 9.5. This new release improves WipeDrive's capabilities and its usability. There are many changes/bug fixes in the software, below are some of the highlights. For a full list of changes and updates in the 9.5 release, please visit our ChangeLog: <https://support.whitecanyon.com/kb/article/62-change-log/>

VNC Capabilities From PXE Server

This new feature allows PXE Clients to be remotely viewed and controlled from the PXE Server. The PXE Server is able to view the PXE Client's screen, perform any task on the PXE Client - just as if it was connected via keyboard and mouse - and change between any of the booted PXE Clients. Ask your Sales Executive for more details.

Licensing Improvements

When using an activation dongle server or license drive method, you can expect activation to run significantly faster.

New HTTP log destination

It's now possible to POST a JSON report to a given URL or WebHook. Ask your Sales Executive for more details.

Enhanced User Field Replacements

Any field available in the JSON report can now be used as a field replacement.
