

CD/USB DEPLOYMENT

PROCESS

- 1) Program initiated via USB drive or CD.
- 2) Selected storage drives are wiped according to selected or pre-configured settings.
- 3) Audit log generated containing drive serial numbers as well as computer hardware details.
- 4) Reports can be sent via email, stored on a network, saved to an attached drive, or stored in a database. Report formats include: PDF, txt, csv, xml, MySQL

KEY POINTS

- All hard drives are wiped in accordance to DoD 5220.22-M specification or any of WipeDrive's supported overwrite patterns. Customers may also create a custom pattern if needed.
- Enterprise Licensing allows duplication of CD or USB Drive software media as needed.
- Software is run from a CD or USB drive.
- Multiple drives are wiped simultaneously within a single device.
- Full audit trail compliant with all major data deletion standards (HIPAA, SOX, DoD, GLB, etc.).
